

DAY 83: Text to Morse Code.

user requests to transfer
"hello world" to Morse code.

> "hello world"

> "... .." returned.

Need a Dict or list with key/value
pairs.
Morse-Code-lookup.

input("Enter your message to be decoded
into Morse code:") [variable user-input]

user_input.split()? .upper()?

for a in user input:

find a in key
value += value.
